Mullica Township Winter Weather Update:
Regional Road Salt Shortage

January 29, 2026

Please be advised that there is a regional road-salt shortage that is impacting Mullica Township and surrounding New Jersey Municipalities. There are numerous factors contributing to the limited access to salt including, delivery and shipping constraints, logistical challenges as well as high demand throughout the State.

While the Department of Public Works in Mullica Township has made extensive efforts to clear all locally maintained roadways, the shortage of available salt has contributed to a difficulty in clearing all roads, especially those that may be secondary roadways or side streets. De-icing material may be allocated for critical areas such as main roads, hills, curves, intersections, and known trouble spots. We continue to use all available resources to salt as the material permits and engage in ongoing plowing and scraping procedures.

As the Winter Conditions persist and challenge Mullica Township and surrounding areas, please exercise extreme caution, slow down, allow extra stopping distance & assume black ice is present during overnight/early morning hours. Ensure that vehicles, trashcans, large equipment and other objects be removed from plowed routes.

You may contact the Public Works Department or Town Hall at 609 561 7070 with any concerns, and look for information and updates regarding these ongoing efforts on our website at MullicaTownship.org.

Monica Newton, Acting Municipal Clerk
